Contents of Volume 65, 2006

(All rights reserved)

Opening Lecture (*28 June–1 July 2005*)

Chair: M. Symonds, *University of Nottingham, Nottingham, UK*

The ancestral human diet: what was it and should it be a paradigm for contemporary nutrition?
S. Boyd Eaton 1–6

The Boyd Orr Lecture (*28 June–1 July 2005*)

Chair: A. Prentice, *Medical Research Council-Human Nutrition Research, Cambridge, UK*

Achieving the goal of halving global hunger by 2015.
P. Shetty 7–18

Plant foods and public health (*Symposium Proceedings: 28 June–1 July 2005*)

Chair: I. Johnson, *The Institute of Food Research, Norwich, UK*

The fibre–folate debate in colo-rectal cancer.
S. Bingham 19–23

Whole grains and CVD risk.
C. J. Seal 24–34

Health effects of vegetarian and vegan diets.
T. J. Key, P. N. Appleby & M. S. Rosell 35–41

Long-chain *n*-3 PUFA: plant *v.* marine sources.
C. M. Williams & G. Burdge 42–50

The Rank Prize Lecture (*28 June–1 July 2005*)

Chair: I. MacDonald, *London, UK*

Zinc: the missing link in combating micronutrient malnutrition in developing countries.
R. S. Gibson 51–60

Phytochemicals (*Symposium Proceedings: 28 June–1 July 2005*)

Chair: R. Mithen, *The Institute of Food Research, Norwich, UK*

Biological effects of fruit and vegetables.
L. O. Dragsted, B. Krath, G. Ravn-Haren, U. B. Vogel, A. M. Vinggaard, P. B. Jensen, S. Loft, S. E. Rasmussen, the late B. M. Sandstrom & A. Pedersen 61–67

Vegetable-derived isothiocyanates: anti-proliferative activity and mechanism of action.
Y. Zhang, S. Yao & J. Li 68–75

Critical review of health effects of soyabean phyto-oestrogens in post-menopausal women.
A. Cassidy, P. Albertazzi, I. L. Nielsen, W. Hall, G. Williamson, I. Tetens, S. Atkins, H. Cross, Y. Manios, A. Wolk, C. Steiner & F. Branca 76–92

Is there a role for dietary salicylates in health?
The late J. Paterson, G. Baxter, J. Lawrence & G. Duthie 93–96

Nutrition Society Medal Lecture (*28 June–1 July 2005*)

Chair: A. Prentice, *Medical Research Council-Human Nutrition Research, Cambridge, UK*

Developmental programming of health and disease.
S. C. Langley-Evans 97–105

Postgraduate Symposium (*28 June–1 July 2005*)

Chair: J. Mathers, *University of Newcastle Upon Tyne, Newcastle Upon Tyne, UK*

Does genotype and equol-production status affect response to isoflavones? Data from a pan-European study on the effects of isoflavones on cardiovascular risk markers in post-menopausal women.
K. Vafeiadou, W. L. Hall & C. M. Williams 106–115

Maternal nutrient restriction alters renal development and blood pressure regulation of the offspring.
K. A. Brennan, D. M. Olson & M. E. Symonds 116–124

Glycaemic index and metabolic disease risk.
L. M. Aston 125–134

Cruciferous vegetables and colo-rectal cancer.
A. Lynn, A. Collins, Z. Fuller, K. Hillman & B. Ratcliffe 135–144

Plenary Lecture (*28 June–1 July 2005*)

Chair: C. M. Williams, *University of Reading, UK*

Herbal medicine: the science of the art.
A. F. Walker 145–152

Enhancing the nutritional value of plant foods (*Symposium Proceedings: 28 June–1 July 2005*)

Chair: S. Fairweather-Tait, *The Institute of Food Research, Norwich, UK*

Biofortification of essential nutritional compounds and trace elements in rice and cassava.
C. Sautter, S. Poletti, P. Zhang & W. Gruissem 153–159

Improving the bioavailability of nutrients in plant foods at the household level.
R. S. Gibson, L. Perlas & C. Hotz 160–168

Biofortification of UK food crops with selenium.
M. R. Broadley, P. J. White, R. J. Bryson, M. C. Meacham, H. C. Bowen, S. E. Johnson, M. J. Hawkesford, S. P. McGrath, F.-J. Zhao, N. Breward, M. Harriman & M. Tucker 169–181

Wild-gathered plants: basic nutrition, health and survival (*Joint Symposium Proceedings with the Royal Botanic Gardens, Kew: 28 June–1 July 2005*)

Chairs: R. McBurney, *Royal Botanic Gardens, Kew, Surrey, UK*; **A. Cassidy,** *University of East Anglia, Norwich, UK*

Linking biodiversity, diet and health in policy and practice.
T. Johns & P. B. Eyzaguirre 182–189

Wild-gathered fungi for health and rural livelihoods.
M. de Román, E. Boa & S. Woodward 190–197

Closing Lecture (*28 June–1 July 2005*)

Chair: S. Fairweather-Tait, *The Institute of Food Research, Norwich, UK*

Plant foods for human health: research challenges.
J. C. Mathers 198–203

Micronutrients through the life cycle (*Symposium Proceedings: 15–17 June 2005*)

Chairs: M. Gibney, *Trinity College Dublin, Ireland*; **I. Rowland, J. J. Strain and H. McNulty,** *University of Ulster, Coleraine, UK*; **K. Cashman and M. Kiely,** *University College Cork, Ireland*

Genetic variation in genes of folate metabolism and neural-tube defect risk.
I. J. M. van der Linden, L. A. Afman, S. G. Heil & H. J. Blom 204–215

Erratum 216

Nutritional support in children and adolescents (*Symposium Proceedings: 16–17 November 2005*)

Chair: T. Murphy, *University College Hospital, London, UK*

Managing children and adolescents on parenteral nutrition: challenges for the nutritional support team.
T. Johnson & E. Sexton 217–221

Home parenteral nutrition and the psyche: psychological challenges for patient and family.
J. Stern 222–226

Influencing post-stress metabolism (*Symposium Proceedings: 16–17 November 2005*)

Chair: G. Grimble, *London Metropolitan University, UK*

Hyperglycaemia and pulmonary infection.
E. H. Baker, D. M. Wood, A. L. Brennan, N. Clark, D. L. Baines & B. J. Philips 227–235

Glutamine and antioxidants in critical care (*Symposium Proceedings: 16–17 November 2005*)

Chair: J. Powell-Tuck, *Barts and the London School of Medicine and Dentistry, UK*

Glutamine in critical care: current evidence from systematic reviews.
A. Avenell 236–241

The biochemical basis of antioxidant therapy in critical illness.
S. Eaton 242–249

REducing Deaths due to OXidative Stress (The REDOXS© Study): rationale and study design for a randomized trial of glutamine and antioxidant supplementation in critically-ill patients.
D. K. Heyland, R. Dhaliwal, A. G. Day, J. Muscedere, J. Drover, U. Suchner and D. Cook for the Canadian Care Trials Group 250–263

Fish oils: a parenteral perspective (*Satellite Symposium Proceedings: 28 June–1 July 2005*)

Chair: G. Carlson, *Hope Hospital, Salford, UK*

Use of fish oil in parenteral nutrition: rationale and reality.
P. C. Calder 264–277

Nutrition and alcoholism (*Joint Symposium Proceedings with the European Society for Biomedical Research on Alcoholism: 6 September 2005*)

Chairs: C. J. Seal and C. P. Day, *Newcastle University, UK*

Alcohol, oxidative stress and free radical damage.
E. Albano 278–290

Moderate alcohol consumption and increased bone mineral density: potential ethanol and non-ethanol mechanisms.
R. Jugdaohsingh, M. A. O'Connell, S. Sripanyakorn & J. J. Powell 291–310

Nutritional influences on developmental immunology (*Joint Symposium Proceedings with the British Society for Immunology, Developmental Immunology Group: 9 December 2005*)

Chairs: L. Harbige, *University of Greenwich, London, UK*; **M. Turner,** *Babraham Institute, Cambridge, UK*

Early immunological development and mortality from infectious disease in later life.
S. E. Moore, A. C. Collinson, P. T. N'Gom, R. Aspinall & A. M. Prentice 311–318

Nutritional factors and immunological ageing.
B. Lesourd 319–325

Appreciation

Nicholas G. Norgan (1941–2006)
S. J. Ulijaszek & P. R. M. Jones 326

Editorial

Plus ça change ...
G. R. Goldberg 327–328

Sir David Cuthbertson Medal Lecture (*16–17 November 2005*)

Chair: G. Grimble, *London Metropolitan University, UK*

Hunting for new pieces to the complex puzzle of obesity.
G. Frühbeck 329–347

Nutrition and health in children and adolescents (*Symposium Proceedings: 14–16 June 2006*)

Chairs: K. Cashman, *University College Cork, Republic of Ireland;* **M. B. E. Livingstone,** *University of Ulster, Northern Ireland;* **J. Woodside,** *Queens University Belfast, Northern Ireland;* **M. A. T. Flynn,** *Food Safety Authority of Ireland, Dublin, Republic of Ireland;* **K. Younger,** *Dublin Institute of Technology, Republic of Ireland*

Nutrition and bone growth and development.
A. Prentice, I. Schoenmakers, M. A. Laskey, S. de Bono, F. Ginty & G. R. Goldberg 348–360

Dietary influences on cognitive development and behaviour in children.
J. Stevenson 361–365

Dietary quality and adequacy of micronutrient intakes in children.
I. Thorsdottir & B. S. Gunnarsson 366–375

Motivation for eating behaviour in adolescent girls: the body beautiful.
A. J. Hill 376–384

Body fat measurements in children as predictors for the metabolic syndrome: focus on waist circumference.
H. D. McCarthy 385–392

The effect of physical activity on body fatness in children and adolescents.
K. L. Rennie, J. C. K. Wells, T. A. McCaffrey & M. B. E. Livingstone 393–402

Methods of defining best practice for population health approaches with obesity prevention as an example.
D. A. McNeil & M. A. T. Flynn 403–411

Dietary management of food allergy in children.
K. E. C. Grimshaw 412–417

Developing professionalism in public health practice (*Workshop Proceedings: 19 October 2005*)

Chair: J. P. Landman, *The Nutrition Society, London, UK*

Sustainability in local public health nutrition programmes: beyond nutrition education, towards community collaboration.
F. Rabiee 418–428

Getting quality in qualitative research: A short introduction to feminist methodology and methods.
M. Landman 429–433

Notice of retraction

Effects of *n*-3 fatty acids on cartilage metabolism.
C. L. Curtis, S. G. Rees, J. Cramp, C. R. Flannery, C. E. Hughes, C. B. Little, R. Williams, C. Wilson, C. M. Dent, J. L. Harwood & B. Caterson 434

Abstracts of Original Communications

The effect of altered feeding times on bone collagen turnover and the skeletal circadian rhythm.
F. Gossiel, K.L. Procter, A.L. Bonnett, C.A. Harrison, M.E. Barker & A. Blumsohn 2A

An economic assessment of perioperative oral nutritional supplements in patients undergoing elective moderate to major lower gastrointestinal surgery.
M. James, E. Stokes, T. Bowling, F. Smedley, P. Jones & D. Silk 4A

Food snacks or liquid oral nutritional supplements as a first-line treatment for malnutrition in post-operative patients?
R.J. Stratton, G. Bowyer & M. Elia 4A

Deprivation linked to malnutrition risk using the Malnutrition Universal Screening Tool ('MUST') in hospital.
R.J. Stratton, C.L. King, Y. Teng & M. Elia 5A

What is the cost of a minor surgical complication to the health service?
M. James & E. Stokes 5A

Nutritional supplementation and hip fracture patients – implications for future research trials.
A. Ashworth 6A

Percutaneous endoscopic gastrostomy: an audit on the impact of a nutrition team on mortality rates.
S. Nair, R. Badreldin, S. Jowett & N.P. Thompson 6A

A local nutritional screening tool compared with the Malnutrition Universal Screening Tool (MUST).
K. Gerasimidis, P. Drongitis, L. Murray & R.F. McKee 7A

The impact of percutaneous endoscopic gastrostomy (PEG) feeding upon quality of life in adults.
A.M. Brotherton, J. Abbott & P. Aggett 7A

Derived anthropometric indices – which should be used to assess nutritional status in children?
H. McCarthy 8A

Growth of surgical neonates requiring parenteral nutrition is blunted by sepsis.
E.G.P. Ong, S. Eaton, A. Pierro & The Baps Multicentre Research Group 8A

Use of multi-frequency electric impedance tomography (EIT) removes the need to add sodium to enteral feed when measuring gastric emptying.
C.T. Soulsby, A. Romsauerova, R. Yerworth, L. Horesh, D.F. Evans, D. Holder & J. Powell-Tuck 9A

Does introducing enteral tube feeding guidelines in an intensive therapy unit help patients meet their nutritional requirements?
J.L. McKinlay & E.S.Y. Wood 9A
Role of gut hormones in acutely ill patients.
M. Nematy, J.E. O'Flynn, L. Wandrag, A.E. Brynes, S. Brett & G.S. Frost 10A
Macronutrient infusions have differential effects on ghrelin and peptide YY levels but do not acutely affect hunger and satiation in parenterally fed patients.
C.D.R. Murray, C. Gouveia, C. Le Roux, A.V. Emmanuel & S. Gabe 10A
Long-term subcutaneous fluid infusion in the management of intestinal failure – experience from two tertiary referral centres.
D.A.J. Lloyd, R.N. Cunliffe, A. Postgate, A. Forbes, T.E. Bowling & S.M. Gabe 11A
Are we underfeeding our surgical neonates on parenteral nutrition?
E.G.P. Ong, S. Eaton, A. Pierro & The BAPS Multicentre Research Group 11A
Is overweight and obesity a potential problem in the well HIV population?
N. Balachander, M. Phillpot, S. Mandalia & C. Geissler 12A
Experience of gastrostomy tubes placed within a head and neck unit between August 2003 and April 2005.
J.M. Jefford, L. Coffey, P. Williamson, N. Hyde & P. Neild 12A
Percutaneous gastrostomy feeding in adult patients with cystic fibrosis: a 10-year experience.
E. Mahmoudzadeh, S. Lal & A.K. Webb 13A
Nutritional outcomes of total oesaphagogastric dissociation (TOGD): a 10-year review.
H. McCarthy, R. Lo Piccolo & A. Morabito 13A
Bridle fixation of nasogastric tubes – the Addenbrooke's experience.
S. Karanth, L. Russell, N. Turnbull, H. Lawrence, C. Hames, J. Binnie, S. Cottee & J. Woodward 14A
Guess my weight! An audit of hospital scales in ward areas.
L. Russell, T. Edgeway, N. Woodruff, H. Lawrence, C. Hames, S. Cottee & J. Woodward 14A
Endocrine response to laparoscopic compared with open surgery in children.
M. McHoney, S. Eaton, E.M. Kiely, D. Drake & A. Pierro 15A
Percutaneous endoscopic gastrostomy activity at a district general hospital. How do we compare with national results?
M. Wong, S. Tye & D.S. Rowbotham 15A
Home enteral feeding following oesophagogastrectomy for oesophageal carcinoma.
P.M. Murphy, J. Rahamim, T. Wheatley & S.J. Lewis 16A
An audit of the prescribing of enteral sip feeds amongst general practitioner practices in Greenwich Teaching Primary Care Trust.
S.O. Oladipo 16A
The effectiveness of standard parenteral nutrition regimens in meeting calculated nutritional requirements.
S. Robertson, C. Garvi, L. Murray, S. Leadbetter & R.F. McKee 17A
Retrospective audit of peripheral parenteral nutrition via midlines: effect of omitting hydrocortisone and heparin in a new regimen.
L. Brown, M. Patrick, L. O'Dell, C. Day, C. White & A. Cole 17A
Percutaneous endoscopic gastrostomies are reservoirs of microbial contamination during nutritional treatment.
M. Caplan, L.T. Tan, P. Jackson, J. Bendig & A.G. Lim 18A
Stroke, dysphagia and percutaneous endoscopic gastrostomy: a retrospective analysis of patient outcomes.
J.A. Marshall & L.E. Rogers 18A

Preventing malnutrition in elderly hospitalised patients by using food as treatment.
T. McDougall, J. Hannah, S. Baranidharan & R. Watson 19A
A re-audit of the effect of 'nil by mouth' instructions on patient behaviour.
C.A. Best, J.E. Kimble & H.M. Gordon 19A
Comparison of the Scottish Home Parenteral Nutrition Managed Clinical Network clinical standards for home parenteral nutrition and patients' experiences.
J.P. Baxter & R.F. McKee 20A
Malondialdehyde in plasma and exhaled breath condensate collected from ventilated infants.
F. Morini, W. Muller, A. Jaffé, M.J. Peters, A. Goldman, A. Pierro & S. Eaton 20A
Prospective 3-month audit of gastrostomy insertion in the Northern region.
S. White, A. Torrance & K. Matthewson 21A
Management of nasogastric tube feeding in a district general hospital with particular reference to the British Society of Gastroenterology Guidelines.
J. Gasem, M. Murthy & E. Roche 21A
The impact of a specialist nurse on outcome of percutaneous endoscopic gastrostomy feeding – completing the audit cycle.
M. Allen, E. Roche & P. Foster 22A
The use of the Malnutrition Universal Screening Tool (MUST) in liver clinics.
B.S. Höroldt, S.C. Cooper, J. Neuberger & J. Johnson 22A
Adaptation of the Malnutrition Universal Screening Tool (MUST) enables improved identification of liver in-patients at nutritional risk.
S.C. Cooper, B.S. Höroldt, L. Ryder, J.M. Neuberger & J. Johnson 23A
Comparison of the Angus Nutritional Screening Tool with the Malnutrition Universal Screening Tool (MUST).
C. McKenzie, C. Aitken & F. Lyon 23A
Assessing the nutritional status of children and adolescents attending a special needs secondary school.
H. McCarthy & J. Cheetham 24A
Audit of nutritional guidelines for head and neck cancer patients undergoing radiotherapy.
K. Wood 24A
Parenteral nutrition in the north of England.
S.A. Hearnshaw & N.P. Thompson, on behalf of the Northern Nutrition Network 25A
Survey of consultant medical staff to determine the need for a quality of life questionnaire specifically for patients receiving home parenteral nutrition.
J.P. Baxter, P.M. Fayers & A.W. McKinlay 25A
Longitudinal trends in quality of life after starting home parenteral nutrition: a randomised controlled study of telemedicine.
A. Chambers, E. Hennessy & J. Powell-Tuck 26A
Impact of the nutrition support team on catheter-related infection.
A.L. Jukes, A.B. Hawthorne, A.M. Abdoolla, S. Harwood & W.N. Magambo 26A
A survey of home enteral tube feeding (HETF) practice across the UK.
J. Parkes, L. Pettifer & T. Bowling 27A
Home parenteral nutrition (HPN) patients – a constantly changing group.
J.P. Baxter & R.F. McKee, on behalf of the Scottish Home Parenteral Nutrition Managed Clinical Network 27A
The relationship between riboflavin intake, serum homocysteine and thermolabile methylenetetrahydrofolate reductase genotype in young adults: The Northern Ireland Young Hearts Project.
M.C. McKinley, J.V. Woodside, L.J. Murray, P.J. Robson, J.J. Strain, H. McNulty, C.A.G. Boreham, A.S. Whitehead & I.S. Young 29A

Effect of alcohol on homocysteine and B-vitamin concentration in healthy male volunteers.
J.V. Woodside, A. Gibson, I.S. Young, P.C. Sharpe, C. Mercer, C.C. Patterson, L.A.J. Kluijtmans, A.S. Whitehead & A. Evans 29A
A comparison of lactulose and inulin as substrates for the hydrogen breath test in males.
M. Clegg & A. Shafat 30A
Socio-economic examination of Irish data from pan-EU attitudinal surveys regarding food, nutrition, physical activity, body weight and health.
D.M.A. McCartney, K.M. Younger & J.M. Kearney 30A
A preload study to evaluate the effects of solid *v.* liquid, and water *v.* air on satiety and subsequent intakes.
P.A. Irvine, R.W. Welch, M.B.E. Livingstone, A. Dunne & A. Mullee 31A
Predictors of asthma in children in Ireland: a multivariate analysis of dietary factors during pregnancy.
N. Fitz-Simon, U. Fallon, M.R. Sweeney, D. O'Mahony, G. Bury, A.W. Murphy & C. Kelleher for the Lifeways Steering Group 31A
Dietary intakes in Irish infants from 12 to 18 months.
S. Boland, A. Collins, I. Blossfeld & M. Kiely 32A
Nutritional profiling schemes: evaluation using national dietary surveys.
J.L. O'Neill, S.N. McCarthy, C. Quinio, J.-L. Volatier & M.J. Gibney 32A
Dietary energy density (ED) in Irish children aged 5–12 years.
J. Walton, E.M. Hannon & A. Flynn 33A
Sodium intakes from food sources in Irish adults aged 18–64 years and Irish children aged 5–12 years.
R. Moloney, E.M. Hannon, M. Kiely & A. Flynn 33A
Contribution of fortified foods (FF) to nutrient intakes in Irish children aged 5–12 years.
E.M. Hannon & A. Flynn 34A
Contribution of nutritional supplements to micronutrient intakes in Irish children aged 5–12 years.
E. Walsh, E.M. Hannon & A. Flynn 34A
Determinants of 25-hydroxyvitamin D levels in a representative sample of Northern Irish adolescents.
T. Hill, A. Cotter, J. Wallace, P.J. Robson, C. Boreham, W. Dubitzky, L. Murray, A. Flynn, M. Kiely & K.D. Ca¬hman 35A
Maternal vitamin D insufficiency during pregnancy in an ethnically-diverse population.
L. Brough, G.A. Rees, M.A. Crawford, P. Timms & T. Venton 35A
Assessment of 25-hydroxyvitamin D and 1,25-dihydroxycholecalciferol concentrations in male and female patients with multiple sclerosis and control volunteers.
M.S. Barnes, M.P. Bonham, P.J. Robson, J.J. Strain, A.S. Lowe-Strong, J. Eaton-Evans, F. Ginty & J.M.W. Wallace 36A
Vitamin K status and bone health indices in Danish girls.
E.M. Oconnor, C. Mølgaard, K.F. Michaelsen, J. Jakobsen, C.J.E. Lamberg-Allardt & K.D. Cashman 36A
Moderate energy restriction influences bone turnover in overweight young adults over a period of 8 weeks.
A. Lucey, G. Paschos, K.D. Cashman, J.A. Martinéz, I. Thorsdottir & M. Kiely 37A
Salmon intake reduces CCR5 expression by human $CD8^+$ T lymphocytes.
G.K. Paschos, P. Scully, A. Lucey, K. Galvin, K.D. Cashman & M. Kiely 37A
Eating habits of Liverpool primary schoolchildren 2000–5.
B. Johnson, A.F. Hackett, L.M. Boddy & L. Lamb 38A
A map of the eating habits of 10-year-old children in Liverpool: a preliminary study.
A.F. Hackett, L.M. Boddy, J. Boothby, B. Johnson & G. Stratton 38A

Self-reported weight and height: response rates from Irish schoolchildren.
C.N.M. Kelly, M. Molcho, C. Kelleher & S. Nic Gabhainn 39A
Relative validity of a food-frequency questionnaire for preschool children compared with a 4 d diet diary.
L.C.A. Craig & G. McNeill 39A
Maternal education is associated with mis-reporting of energy intake in parent records of child's diet.
L. Johnson, A.P. Mander, L.B. Jones, P.M. Emmett & S.A. Jebb 40A
Oral nutritional supplements in the community in Ireland: who is using them?
S. Kennelly, S. Sugrue, N.P. Kennedy, G. Flanagan & C. Glennon 40A
Dietary fibre (DF) and NSP intake in Irish children aged 5–12 years.
C. Deasy, J. Walton, E.M. Hannon & A. Flynn 41A
Fortified food (FF) consumption in Irish children aged 5–12 years.
E.M. Hannon & A. Flynn 41A
The relationship between fruit, vegetable and fruit juice consumption at adolescence and subsequent respiratory health in early adulthood: The Northern Ireland Young Hearts Project.
C.E. Neville, J.V. Woodside, M.C. McKinley, L.J. Murray, G.W. Cran, C.A.G. Boreham & P.G. McCarron 42A
Fruit and vegetable consumption and blood pressure: The Northern Ireland Young Hearts Project.
C. McGartland, J.V. Woodside, P. Robson, L. Murray, G. Cran, D. Watkins, M. Rooney, J. Savage & C. Boreham 42A
Comparisons of body-weight status in British Bangladeshi and Indian children residing in London.
D. Samani, T. Anwar & H.D. McCarthy 43A
What is the best measure of fatness during a weight-management programme in obese children?
D. Samani, S. O'Callaghan & H.D. McCarthy 43A
Fish consumption as part of an energy-restricted diet reduces serum markers of inflammation.
G.K. Paschos, A. Lucey, I. Thorsdottir, J.A. Martinez, K.D. Cashman & M. Kiely 44A
Breast-feeding rates and factors affecting breast-feeding initiation in a group of women with and without diabetes.

An illustration of post-partum hypoglycaemia in respect to breastfeeding for women with type 1 diabetes – a case study.
J.C. Abayomi, G. Morrison, K. McFadden, T. Purewal & A.F. Hackett 45A
Ethnic differences between questionnaire-reported and 3 d dietary-recall estimations of fruit and vegetable consumption in girls aged 12–16 years.
A. Surujlal-Harry, G.A. Rees, S. Bakhshi & A. Baker 45A
Programming effects of folic acid supplementation in rat pregnancy on blood pressure and abdominal fat deposition.
S.C. Langley-Evans, A Haase & S.F. Engeham 47A
Healthcare professionals' knowledge of infant-feeding recommendations in selected clinics in Singapore.
W.M. Han, J.B. Morgan & Y.H. Chan 47A
Effect of consumption of five portions of fruit and vegetables as juice shots on risk factors for cardiovascular disease.
T.W. George, E. Paterson, S. Waroonphan, M.H. Gordon & J.A. Lovegrove 48A
The role of fat in gastrointestinal transit of obese and lean men.
M. Clegg & A. Shafat 48A

Nutritional status and subsequent all-cause mortality in men and women over 75 years old living in the community.
X. Jia, G. McNeill & L.S. Aucott 49A
Assessment of the micellarisation of α-tocopherol from processed meat products using an *in vitro* model.
O. Kenny, Y.C. O'Callaghan & N.M. O'Brien 49A
The impact of increased wholegrain food consumption on daily intake of nutrients.
A.R. Jones, S. Kuznesof, D.P. Richardson & C.J. Seal 50A
Lack of effect of increased fruit and vegetable intake on plasma 8-isoprostane F2α concentrations.
U. Mulla, S.E.E. Berry, R. Gray & T.A.B. Sanders 50A
Effects of exercise on energy compensation in healthy sedentary volunteers.
C. Martins, H. Truby & L. Morgan 51A
Visual estimation of nutritional status in older subjects by carers, using comparative silhouettes of body shapes.
C.R. Hankey, L. Watson & W.S. Leslie 51A
Supplement use and comparative differences in nutritional status amongst patients with multiple sclerosis.
H. Bennewith, B. Weller, C. O'Leary, D. O'Reilly, A. Duncan, L. Wood, L. Paul & A. Payne 52A
Exercise induced anorexia: a role for PYY, GLP-1 and PP?
C. Martins, L.M. Morgan & M.D. Robertson 52A
Caffeine intake during pregnancy.
S.M. Boylan, S.F.L. Kirk, D.C. Greenwood & J.E. Cade 53A
Tracking patterns of fruit and vegetable intakes from childhood to adulthood and their relationships with social class: longitudinal tracking from the 1946 British Birth Cohort.
Y. Chen, A.M. Stephen, A. Mander, C.J. Prynne & M.E.J. Wadsworth 53A
Effect of short-term high- and low-glycaemic-index diets on subjective measures of appetite, and plasma glucose, insulin and ghrelin concentrations in healthy male subjects.
D. Grigoropoulou, A. Parrett, C.A.E. Edwards, D. Malkova & S. Higgins 54A
Dietary flavanones are associated with increased bone mineral density and reduced bone resorption in early postmenopausal Scottish women.
A.C. Hardcastle, J.A.M. Kyle, G. Duthie, G. McNeill, W.D. Fraser, D.M. Reid & H.M. Macdonald 54A
Implementing lifestyle interventions to reduce chronic disease risk: lessons from diabetes prevention trials.
A.S. Anderson, C.S. Ferguson, K.L. Barton & R.J.C. Steele 55A
Development of high-fibre, low-glycaemic index novel food products for the management of type 2 diabetes mellitus employing the food multimix concept.
P. Amuna, N.L. Hill, F.B. Zotor & V. Trowse 55A
Age-related changes in taste and effect on food supplement palatability.
K.W.C. Law, M.A. Gosney & O.B. Kennedy 56A
Food group intake in a sample of primary school children participating in the Phunky Foods programme.
P.G. Lock & J.E. Cockroft 56A
Effects of alcohol consumption on weight gain in middle-aged women.
A. McAuley, V.J. Burley, J.D. Thomas, E.F. Taylor & J.E. Cade 57A
Glycaemic potency of breakfast and cognitive function in school children.
R. Micha, J. Forbes, K. Lowes, P. J. Rogers & M. Nelson 57A

Comparison of caffeine consumption in pregnancy using the Caffeine Assessment Tool and a 24 h diet recall.
T. Moore, S.M. Boylan, S.F.L. Kirk, J.D. Thomas & J.E. Cade 58A
Fatigue during low-carbohydrate dieting in sedentary obese men.
A. O'Sullivan, D. Bremner, S. Murison, G. Horgan, G.E. Lobley & A.M. Johnstone 58A
The effect of a 12-week low-glycaemic index diet on heart disease risk factors and 24 h glucose profile in healthy middle-aged volunteers at risk of heart disease: a pilot study.
E. Philippou, B. McGowan, A.E. Brynes, A. Dornhorst & G.S. Frost 59A
An exploration into the proportion of carbohydrate used in the calculation of diet glycaemic index (GI) for which GI values are published or estimated.
E. Philippou, J.E. Milton, A.E. Brynes & G.S. Frost 59A
Glycaemic properties of quinoa (*Chenopodium quinoa* Willd.).
V. Zevallos, G. Grimble & L.I. Herencia 60A
Milk choice across social class in the MRC National Survey of Health and Development.
A.P. Rickard, A.M. Stephen, C.J. Prynne, A.P. Mander & M.E.J. Wadsworth 60A
Docosahexaenoic acid but not eicosapentaenoic acid mediates the anti-inflammatory effect in dendritic cells via peroxisome proliferator-activated receptor-γ-dependent pathway(s).
C. Reynolds, E. Draper, C.E. Loscher & H.M. Roche 61A
Transcriptional regulation of splice variants of the SLC30A5 human zinc transporter in intestinal (Caco-2) and placental (JAR) cell lines.
K.A. Jackson, E.D. O'Neill, J.C. Mathers & D. Ford 61A
The cellular response of normal human colonocytes to folate deficiency *in vitro*: proteomic and functional analyses.
S.J. Duthie, C.S. Bestwick, Y. Mavrommatis, M.P. Moyer & L.P. Pirie 62A
Oxidised low-density lipoprotein- and oxysterol-induced cell death in U937 and HL-60 blood cells.
S. Lordan, Y.C. O'Callaghan & N.M. O'Brien 62A
Postprandial ghrelin suppression is exaggerated following major surgery; implications for nutritional recovery.
M. Nematy, A.E. Brynes, P.I. Hornick, S.J. Brett & G.S. Frost 63A
Bioavailability of carotenoids determined by a Caco-2 cell model.
L.P. O'Sullivan, L. Ryan & N.M. O'Brien 63A
The association of single nucleotide polymorphisms with β-glucosidase activity in oral epithelium.
L.A. Wakeling, E.F. McGarr & D. Ford 64A
Transcriptional regulation of the microsomal triacylglycerol transfer protein by members of the nuclear hormone receptor superfamily.
T. Vallim, A, Salter & A. Bennett 64A
Dietary protein restriction in the pregnant rat induces altered epigenetic regulation of the glucocorticoid receptor and peroxisomal proliferator-activated receptor α in the heart of the offspring which is prevented by folic acid.
K.A. Lillycrop, E.S. Phillips, A.A. Jackson, M.A. Hanson & G.C. Burdge 65A
Sulforaphane as a histone deactylase inhibitor.
K.F. Chambers, M. Traka & R.F. Mithen 65A
Reactive oxygen species generation in mismatch repair-proficient and -deficient colorectal cancer cell lines exposed to butyrate.
J.M. Coxhead, W. Bal, E.A. Williams & J.C. Mathers 66A
A polymorphism in the coding region of human selenoprotein P gene influences the response to selenium supplementation in healthy volunteers.
C. Meplan, K. Crosley, F. Nicol, G.J. Beckett, J.R. Arthur, J.C. Mathers & J.E. Hesketh 66A

Influences of gender and genetic variation in the 3′ untranslated region of the glutathione peroxidise 4 gene on the response to selenium supplementation in healthy volunteers.
C. Meplan, K. Crosley, F. Nicol, J.R. Arthur, J.C. Mathers & J.E. Hesketh 67A
Effect of conjugated linoleic acid isomers on plasma lipoproteins and hepatic low-density lipoprotein receptor mRNA concentration in the hamster.
E. Tarling, K. Ryan, S. Steenson, J. Laker, A. Bennett & A. Salter 67A
Selection for growth increases the penalty of parasitism on growth performance in mice.
J.G.M. Houdijk & L. Bunger 68A
Blood–brain transport of leptin: influence of photoperiod and leptinaemia in sheep.
C.L. Adam, P.A. Findlay, E.J. Bennett, J.L. Harrison & D.W. Miller 68A
Insulin blood–brain transport and appetite responses to central insulin infusion in sheep.
E.J. Bennett, J.L. Harrison, P.A. Findlay, D.W. Miller & C.L. Adam 69A
RRR-α-tocopherol supplementation has pro- and anti-inflammatory and pro- and antioxidant effects in peripheral blood mononuclear cells in healthy middle-aged men depending upon dosage and genotype for xenobiotic metabolising enzymes.
A. England, J. Slater-Jefferies, E.A. Miles, L. Browning, K. Grimaldi, R. Gill-Garrison, P.C. Calder, W.M. Howell & R.F. Grimble 69A
Feeding a protein-restricted diet during pregnancy in the rat induces changes to DNA methylation in the liver of the F_1 and F_2 offspring after weaning.
G.C. Burdge, J.L. Slater-Jefferies, C. Torrens, M.A. Hanson & K.A. Lillycrop 70A
The intracellular genistein metabolite 5,7,3′,4′-tetrahydroxyisoflavone mediates G2-M cell cycle arrest in cancer cells via modulation of the p38 signalling pathway.
J.P.E. Spencer, D.T. Nguyen, E. Hernandez-Montes, D. Vauzour, A.H. Schönthal & E. Cadenas 70A
TUB gene variants are associated with body mass index, weight and body fat in postmenopausal women.
S.D. O'Dell, H. Snieder, X. Wang, R. Shiri-Sverdlov, J.V. van Vliet-Ostaptchouk & T.D. Spector 71A
Polymorphisms at IL-6–174 and TNF-α-308 and body mass index modulate the effects of fish oil supplementation on cytokine production by monocytes from healthy middle-aged men.
J. Madden, A. Brunner, J.J. Carrero, J. Hadley, B. Tan, N. Dastur, C.P. Shearman, P.C. Calder, E. Rainger, G. Nash, T. Luu & R.F. Grimble 71A
Influence of superoxide dismutase polymorphism and overweight status on clinical outcome and oxidant production and stress in healthy middle-aged men and rheumatoid patients receiving high-dose RRR-α-tocopherol supplementation.
J. Slater-Jefferies, A. England, B. Cichon, K. Grimaldi, R. Gill-Garrison, P.C. Calder, W.M. Howell, R. Armstrong & R.F. Grimble 72A
Effects of changes in protein supply and demand on gastrointestinal parasitism in lactating rats.
H. Normanton, J.G.M. Houdijk, D.P. Knox & I. Kyriazakis 72A
The acute effect of triacylglycerols rich in stearic and oleic acid on vascular function.
S.E.E. Berry, R. Banerji, S. Tucker, S.M. Charles, B. Jiang, P.J. Chowienczyk & T.A.B. Sanders 73A
Effects of parasitic infection on anorexia and leptin levels in lambs of two different breeds.
K. Zaralis, B.J. Tolkamp, J.G.M. Houdijk, A.R.G. Wylie & I. Kyriazakis 73A
Fatty acids differentially affect endothelial cell inflammatory gene expression.
D.I. Shaw, W.L. Hall & C.M. Williams 74A
Glycaemic response to a high-fibre, low-glycaemic index novel food product in human volunteers: possible implications for dietary management of type 2 diabetes mellitus.
V. Trowse, P. Amuna, F.B. Zotor & N.L. Hill 74A

Insulin sensitivity from an oral labelled glucose test.
M.E. Pennant, L.J.C. Bluck & W.A. Coward 75A
Do differences exist between gym and non-gym users' nutritional knowledge and use of nutrition labels?
S.D. Wade & O.B. Kennedy 75A
Effect of consuming cooked broccoli along with a high- or low-protein meal on the uptake of sulforaphane in healthy human subjects.
V. Rungapamestry, A.J. Duncan, Z. Fuller & B. Ratcliffe 76A
Inter-individual variation in the absorption of salicylic acid from food.
A. Wood, G. Baxter, F. Thies & G. Duthie 76A
Role of eating frequency and macronutrient content of in-between-meal snacks in body weight control in overweight men aged 25–50 years – preliminary results.
S. Zaveri & S. Drummond 77A
Exposure to a maternal low-protein diet in rat pregnancy programmes metabolic syndrome-like phenotype in 18-month-old offspring.
A.M. Erhuma, S.C. Langley-Evans & A.J. Bennett 77A
Exposure to a maternal low-protein diet in rat pregnancy programmes altered expression of fat metabolism-regulated genes.
A.M. Erhuma, S.C. Langley-Evans & A.J. Bennett 78A
Nutritional and hormonal influences on hepatic sterol regulatory element-binding protein-1c expression in low-protein-exposed offspring.
A.M. Erhuma, S.C. Langley-Evans, L. Bellinger, S. McMullen & A.J. Bennett 78A
Effects of dietary zinc during pregnancy upon placental insulin-like growth factor 2 mRNA expression in C57BL/J6 mice.
J.A. McKay, R.M. Russi, S.R. Philips, J.C. Mathers & D. Ford 79A
Folate-deficient diets fed to pregnant rats cause changes in the mRNA associated with lipid metabolism in the fetus.
W.D. Rees, S.M. Hay, C.J. McNeil & C.A. Maloney 79A
The effect of increasing the eicosapentaenoic acid and docosahexaenoic acid content of a test meal on the postprandial changes in blood triacylglycerol concentration in men and post-menopausal women aged 50 to 65 years consuming their habitual diets.
G.C. Burdge, J. Powell & P.C. Calder 80A
Impact of dietary changes in *n*-6:*n*-3 polyunsaturated fatty acid ratio on serum triacylglycerols in healthy men and women.
C.S. Moore, S.P. Bryant, G.D. Mishra, J.D. Krebs, L.M. Browning & S.A. Jebb 80A
Postprandial hepatic glycogen and lipid synthesis of rats maintained on a high-protein diet with varied fat and vitamin B_6 levels.
M. Marji, N. Hwalla & O.A. Obeid 81A
Lack of effect of moderate intakes of docosahexaenoic acid on *in vivo* lipid indices of lipid peroxidation.
T.A.B. Sanders, D.C.S. Talbot & H.E. Theobald 81A
Diurnal variation in glycaemic index: comparison of a low- and high-glycaemic index mixed meal.
M. Gibbs, A. Jetha, D. Mellor & S. Hampton 82A
Fat and carbohydrate do not displace each other in the diet.
G.W. Horgan, S. Whybrow & J. Stubbs 82A
Antioxidant imbalance in ulcerative colitis.
P. Rana, A.S. Anderson & J.H. Cummings 83A
The application of a high-throughput robotic ELISA-reader system to measure total antioxidant capacity in alcoholic and non-alcoholic beverages and wine-related compounds.
M.C.Y. Wong, R. West, A. Spurr, C. Lloyd, M.J. Arno, H. Wiseman & V.R. Preedy 83A

Antioxidant capacity of UK beers.
R. Meynell, M.C.Y. Wong, S. Mahalingam, J.A. Fegredo, M.J. Arno, S. Milligan, H. Wiseman & V.R. Preedy 84A
Differences in typical food portion sizes eaten by institutionalised older adults compared with free-living.
W.L. Wrieden, K.L. Barton, A.J. Adamson & L. Cochrane 84A
Vitamin E supplementation and mechanical texture measurement of cooked poultry meat.
O.B. Kennedy, B.J. Stewart-Knox, P.C. Mitchell & D.I. Thurnham 85A
Diet, lifestyle and osteoporotic fracture risk in post-menopausal South Asian women living in Blackburn, UK.
S. Mitra, J.F. McCann, I. Bhojani, P.C. Foster, P.A. Judd, B. Ellahi & N.M. Lowe 85A
A proteomic analysis of aortic proteins in zinc and metallothionein deficiency.
J.H. Beattie, M.-J. Gordon, G.J. Rucklidge, M.D. Reid & I.S. Kwun 86A
Does dietary fibre intake protect against the risk of developing breast cancer? Evidence from the UK Women's Cohort Study.
J.E. Cade, V.J. Burley & D.C. Greenwood 86A
The effect of dietary protein restriction in pregnant rats on the expression of DNA methyltransferases and methyl CpG binding protein 2 in the liver after weaning.
K.A. Lillycrop, A.A. Jackson, M.A. Hanson & G.C. Burdge 87A
Identification of potential serum biomarkers of inflammation and lipid modulation that are altered by fish oil supplementation in healthy volunteers.
B. De Roos, A. Geelen, K. Ross, G. Rucklidge & I. Brouwer 87A
The effects of altering the dietary *n*-6:*n*-3 fatty acids ratio on insulin sensitivity, lipoprotein size and postprandial lipaemia in older UK men and women. The OPTILIP study.
M.D. Griffin, T.A.B. Sanders, I.G. Davies, F. Lewis, S. Slaughter, D.J. Millward & B.A. Griffin 88A
Influence of CD36 gene polymorphisms on the response of cardiovascular risk factors to fish oil supplementation in middle-aged men.
J. Madden, A. Brunner, J.J. Carrero, J. Hadley, B. Tan, C.P. Shearman, P.C. Calder, E. Rainger, G. Nash, T. Luu & R.F. Grimble 88A
Genetic determinants of plasma non-esterified fatty acid composition: a twin study.
P. Haggarty, C. Tuya, G. Hoad, D.M. Campbell, G. Horgan, L. Masson & G. McNeill 89A
IL-1R1$^{-/-}$ mice are resistant to obesity-induced insulin resistance following a high-fat diet.
S. Toomey, J. Browne & H.M. Roche 89A
Hunger and appetite response to a high-protein ketogenic diet in obese men feeding *ad libitum*.
A.M. Johnstone, S. Murison, D.M. Bremner, G. Horgan & G.E. Lobley 90A
The *SH2-B* gene is associated with serum leptin and body fat in normal females.
S.D. O'Dell, Y. Jamshidi, H. Snieder, D. Ge & T.D. Spector 90A
An *in vitro* method to determine the micellarisation percentage of carotenoids in a variety of vegetables.
L. Ryan, O.F. O'Connell & N.M. O'Brien 91A
Replacing breakfast and snacks or desserts with ready-to-eat cereals contributes to weight and fat loss in overweight individuals.
S.A. Clemes, V.J. Burley, S.F.L. Kirk & R.H. Hooper 91A
Preliminary study to investigate what characteristics underlie successful weight loss?
C.J. Bye, J.H. Lavin, S. Whybrow & R.J. Stubbs 92A
Antibiotic-enhancing effects of *Ganoderma lucidum* (Lingzhi) against methicillin-resistant *Staphylococcus aureus*.
S. Wachtel-Galor, M.V. Boost & I.F.F. Benzie 92A

ALLCHANGE: design and implementation of a primary school-based lifestyle intervention.
A.M. Craigie, J.J.F. Belch, A. Greene, S.A. Greene, G. Kennedy, F. Khan, E.M. Roberts & A.S. Anderson 93A
Nutrition and health status of African-Caribbeans living in Staffordshire.
J. Earland & A. Srivastava 93A
Development of a computer-based tool for measuring schoolchildren's diets.
M.S. Taylor, C. Summerbell, A. Adamson, B. Lang & S. Crooks 94A
Perceived persuasiveness of nutrition education messages with different levels of technical language.
N. Asante-Ampaduh & A. Wise 94A
n-3 Long-chain polyunsaturated fatty acid intake from fish and depressed mood: non-linear or confounded association?
K.M. Appleton, T.J. Peters, R.C. Hayward, S.V. Heatherley, S.A. McNaughton, P.J. Rogers, D. Gunnell, A.R. Ness & D. Kessler 95A
Changing trends in physical characteristics and obesity risk in 6–13-year-old Kuwaiti school children. evidence of a nutritional and epidemiological transition?
H. Al-Shamari, P. Amuna, I. Tewfik, A. Bumejjdad & F. Zotor 95A
Indirect estimates of net acid excretion and net rate of endogenous non-carbonic acid production in the young British population: analysis of the National Diet and Nutrition Survey aged 4–18 years.
L. Vokes, R.H.T. Gannon, D.J. Millward, D.P. Lovell, H.M. Macdonald, L.A. Frassetto, T. Remer & S.A. Lanham-New 96A
Recruitment to a dose–response study of the effects of increased fruit and vegetable intake on vascular function: study design and subject characteristics.
S.E.E. Berry, U. Mulla, P.J. Chowienczyk & T.A.B. Sanders 96A
Calculation of typical food portion sizes for adults aged 19–64 years and older individuals aged 65 years and over.
K.L. Barton, W.L. Wrieden, A.J. Adamson & L. Cochrane 97A
Working towards a web-based pan-European access to on-line nutrient databases: UK nutrition researchers' needs and expectations.
A. Fragodt & M.M. Raats 97A
Increasing antioxidant intake from fruits and vegetables – practical possibilities in the Scottish population.
M.A. Haleem, K.L. Barton, S. Ray, A.S. Anderson, G. Borges & A. Crozier 98A
Plasma adiponectin levels after a high-fat meal and a standard mixed meal in lean and obese, young and older men.
F. Tsofliou, C.L. Fyfe, I. Matheson, A.A. Sneddon, D. Jackson, K.W.J. Wahle & L.M. Williams 98A
Red grape juice protects against exercise-induced DNA damage.
A.McE. Jenkinson, S.J. Duthie, J.A.M. Kyle & G.G. Duthie 99A
Lower maternal vitamin E and zinc intakes during pregnancy are associated with an increased risk of asthma in 5-year-old children.
L.C.A. Craig, G. Devereux, S.W. Turner, G. McNeill, S. Martindale, P.J. Helms & A. Seaton 99A
Do functional selenoprotein SNPs predict the risk of prostate cancer?
M.P. Rayman, M.L. Cooper, I. Vishnubhatla, H.-O. Adami, H. Grönberg, K. Bälter & F.R. Green 100A
Impact of high-protein, low- and moderate-carbohydrate diets on the microbial community and on metabolite concentration in faeces: possible implications for gut health.
G.E. Lobley, A. Belenguer, S.H. Duncan, G. Holtrop, A.M. Johnstone & H.J. Flint 100A

Intracellular trafficking and functional activity of splice variants of the zinc transporter SLC30A5.
R.A. Valentine, K.A. Jackson, J.C. Mathers & D. Ford 101A
The apolipoprotein B signal peptide insertion/deletion polymorphism and within-pair differences in lipid levels in twins.
L.F. Masson, A. Cumming, C. Tuya, S. Wood, K.A. Rance & G. McEill 101A
Taste sensitivity phenotype and preference for vegetables in the UK Women's Cohort Study.
J.E. Cockroft & J.E. Cade 102A
Enhancing the population of *Bifidobacteria* in the colon has no effect on the metabolism of glucosinolates from cabbage.
Z. Fuller, V. Rungapamestry, B. Ratcliffe, P. Louis & A.J. Duncan 102A
Does ascorbic acid protect type 2 diabetes subjects from hyperglycaemia-induced endothelial dysfunction?
S.W. Choi, I.F.F. Benzie, C.S.Y. Lam, S.W.S. Chat, J. Lam, C.H. Yiu, J.J. Kwan, Y.H. Tang, G.S.P. Yeung, V.T.F. Yeung, G.C. Woo, J.J. Strain & B.M. Hannigan 103A
Copper homeostasis: use of *in vitro* cell systems and transcriptional analysis to detect markers of copper regulation in human subjects.
G.M. Wortley, R.M. Elliott, L.J. Harvey & S.J. Fairweather-Tait 103A
Iron absorption is normal in subjects with inflammatory bowel disease but haematinics do not predict iron requirements.
W.B. Cook, J.J. Powell & M.C.E. Lomer 104A
Changes in human copper metabolism after dietary intervention: a metabolomic study highlighting the use of genetic algorithms in interpreting ^{1}H nuclear magnetic resonance spectra from urine samples.
J.R. Dainty, L.J. Harvey, G. Legall, E.K. Kemsley, I.J. Colquhoun & S.J. Fairweather-Tait 104A
The effects of long-term folate deficiency on DNA repair protein expression in a nutritional rat model.
S.J. Duthie, L.P. Pirie, G. Grant, A.J. Watson & G.P. Margison 105A
Macular pigment response to a xanthophyll supplement of lutein, zeaxanthin and meso-zeaxanthin
R.A. Bone, J.T. Landrum, Y. Cao, A.N. Howard & D.I. Thurnham 105A
Assessment of skin colour pigmentation in patients undergoing ultraviolet B treatment.
A. Mavroeidi, F. O'Neill, C. Thind, A Ormerod, D.M. Reid & H.M. Macdonald 106A
Predictors of fruit, vegetable and juice intake in an elderly Northern Irish population.
M.C. McKinley, S.E.C.M. Gilchrist, J.V. Woodside, U. Chakravarthy & I.S. Young, on behalf of the European Eye Study (EUREYE) Investigators 106A
Microbial transformation of cinnamic acids in strawberries: potential inflammatory implications.
W.R. Russell, S.H. Duncan, A. Labat, L. Scobbie, A.G. Calder, H.J. Flint & G.G. Duthie 107A
Safety and tolerance of calcium pantothenate in healthy adults.
M. Warnock & D.E. McBean 107A
Effect of oral glucose loading on oxidative stress, antioxidant status and inflammation in healthy and type 2 diabetes mellitus subjects.
S.W. Ma, B. Tomlinson & I.F.F. Benzie 108A
Dietary protein restriction in the pregnant rat induces altered covalent modifications to histones at the glucocorticoid receptor promoter in the liver of the offspring after weaning.
K.A. Lillycrop, A.A. Jackson, M.A. Hanson & G.C. Burdge 108A
Regulation of protein kinase C alpha and iota expression in MCF-7 breast cancer cells by conjugated linoleic acids.
R.H. Crabb-Wyke, M. Goua, P. Kong, S.D. Heys & K.W.J. Wahle 109A

Pharmacological suppression of gastric acid as a novel strategy for reducing non-haem iron absorption and limiting storage iron in hereditary haemochromatosis.
C. Hutchinson, C. Geissler, J. Powell & A. Bomford 109A
Oral ferrous sulfate is associated with an increase in serum non-transferrin-bound iron and a decrease in plasma ascorbate.
C. Hutchinson, J. Powell, I. Mudway & C. Geissler 110A
The protective effects of diethylenetriamine penta-acetic acid treatment on the stability of ascorbate in plasma samples obtained from iron-supplemented subjects.
H. Jan-Mohamed, D.Y. Liu, C.A. Geissler, J.J. Powell, M.C. Lomer & I.S. Mudway 110A
Gene expression in rat liver exposed to acute alcohol and daidzein.
J.Ci. Lin, M.J. Arno, M.C.Y. Wong, V.R. Preedy & H. Wiseman 111A
The effects of conjugated linoleic acid on the surface expression of vascular cell adhesion molecule-1 and intercellular adhesion molecule-1 on TNF-α-stimulated human umbilical vein endothelial cells measured by flow cytometry.
S. Mulgrew, M. Goua, A.A. Sneddon & K.W.J. Wahle 111A
The potential effects of plant extracts in protecting against oxidant-induced injury to Caco-2 cells.
S.A. Aherne, J.P. Kerry & N.M. O'Brien 112A
The effect of maternal nutrient restriction between 30 and 80 d gestation followed by juvenile obesity on glucocorticoid receptor messenger RNA abundance and kidney function in young adult sheep.
P.J. Williams, L. Kurlak, H. Budge, T. Stephenson, A. Perkins, M.E. Symonds & D.S. Gardner 112A
Dietary intake of fish and depressed mood: genuine association or just a mirage?
K.M. Appleton, J.V. Woodside, J.W.G. Yarnell, D. Arveiler, B. Haas, P. Amouyel, M. Montaye, J. Ferrieres, J.B. Ruidavets, P. Ducimetiere, A. Bingham & A. Evans 113A
The dietary phyto-oestrogen daidzein protects against the formation of hepatic malondialdehyde–protein adducts induced by oxidative stress.
M.C.Y. Wong, O. Niemela, S. Parkkila, H. Koivisto, K. Trick, M.R. Labbe, V.R. Preedy & H. Wiseman 113A
Reduced maternal folate supply decreases genomic DNA methylation in the offspring of C57Bl/6J mice.
K.J. Waltham, E.A. Williams & J.C. Mathers 114A
Effects of age, body mass index and genotype on nucleotide excision repair in healthy adults.
J. Tyson, A. Spiers, F. Caple, J.E. Hesketh & J.C. Mathers 114A
An *in vitro* method to determine the percentage micellarisation of carotenoids in a variety of fruits.
O.F. O'Connell, L. Ryan & N.M. O'Brien 115A
Are low-income consumers disadvantaged by higher-priced and lower-nutritional quality fruit and vegetable availability? A preliminary study.
E. Wakeford & R.M. Fairchild 115A
Elevated urinary F_2-isoprostane concentrations are associated with congestive heart failure.
G.C. McKeeman, C.M. Hughes, P.P. McKeown, J.V. Woodside & I.S. Young 116A
Methods used for collecting and handling multilingual qualitative data in the Food in Later Life Project.
M.M. Raats, M. Lumbers & The Food in Later Life Project Team 116A
Association of serum 'antioxidant power' with myocardial infarction: a case–control study.
K.D.R.R. Silva, C.B. Liyanage & D.L.L. Munasinghe 117A
Reported weight loss from a 1-year randomised controlled trial examining three dietary interventions for obesity management: initial findings.
C. Rolland, M. Hession, C. Tuya, S. Murray, K. Jarrett, A. Wise & J. Broom 117A

Comparison of body composition, body fat distribution and cardiovascular risk factors in healthy pre- and postmenopausal women.
K.D.R.R. Silva, S. Thangaraja & R.J. Kamal 118A
A novel indirect calorimeter.
A.P. Bradley 118A
Reduction of growth rate of infants after the age of 6 months due to parents' smoking.
A. Djazayery, M. Ahmadi, A. Rahimi, H. Eftekhar & R. Sheikh–Oleslam 119A
Evidence for the development of specialised bacterial communities on resistant starch in the human colon that promote butyrate formation.
S.H. Duncan, E.C. McWilliam Leitch, A. Walker & H.J. Flint 119A
Effect of wholegrain food on markers of cardiovascular risk in middle-aged healthy volunteers.
P. Tighe, N. Vaughan, J. Brittenden, G. Horgan, W.G. Simpson, W. Mutch, G. Duthie & F. Thies 120A
Effect of ginseng (*Panax ginseng*) supplementation on glucose tolerance, antioxidant status and oxidative stress in type 2 diabetes subjects: results of a placebo-controlled trial.
S.W. Ma, B. Tomlinson & I.F.F. Benzie 120A
Time effects in food frequency consumption and eating behaviour among Irish schoolchildren.
C.N.M. Kelly, S. Nic Gabhainn, K. Walsh & C. Kelleher 121A
Influence of breast-feeding and birth weight on body mass index and waist:hip ratio in Greek women.
E. Economou, G. Begum & S. Mestana 121A

Index of Subjects

Abdominal obesity
Body fat measurements in children as predictors for the metabolic syndrome: focus on waist circumference.
65, 385, 2006, DOI: 10.1079/PNS2006514

Action research
Sustainability in local public health nutrition programmes: beyond nutrition education, towards community collaboration.
65, 418, 2006, DOI: 10.1079/PNS2006517

Adolescence
Motivation for eating behaviour in adolescent girls: the body beautiful.
65, 376, 2006, DOI: 10.1079/PNS2006513

Agrobiodiversity
Linking biodiversity, diet and health in policy and practice.
65, 182, 2006, DOI: 10.1079/PNS2006494

Agronomy
Biofortification of UK food crops with selenium.
65, 169, 2006, DOI: 10.1079/PNS2006490

Ancestral human diet
The ancestral human diet: what was it and should it be a paradigm for contemporary nutrition?
65, 1, 2006, DOI: 10.1079/PNS2005471

Anti-cancer agent
Vegetable-derived isothiocyanates: anti-proliferative activity and mechanism of action.
65, 68, 2006, DOI: 10.1079/PNS2005475

Antioxidants
Alcohol, oxidative stress and free radical damage.
65, 278, 2006, DOI: 10.1079/PNS2006496
REducing Deaths due to OXidative Stress (The REDOXS© Study): rationale and study design for a randomized trial of glutamine and antioxidant supplementation in critically-ill patients.
65, 250, 2006, DOI: 10.1079/PNS2006505
Whole grains and CVD risk.
65, 24, 2006, DOI: 10.1079/PNS2005482

Antioxidant therapy
The biochemical basis of antioxidant therapy in critical illness.
65, 242, 2006, DOI: 10.1079/PNS2006501

Aquaporin
Hunting for new pieces to the complex puzzle of obesity.
65, 329, 2006, DOI: 10.1079/PNS2006510

Aspirin
Is there a role for dietary salicylates in health?
65, 93, 2006, DOI: 10.1079/PNS2005477

Bioavailability
Critical review of health effects of soyabean phyto-oestrogens in post-menopausal women.
65, 76, 2006, DOI: 10.1079/PNS2005476
Improving the bioavailability of nutrients in plant foods at the household level.
65, 160, 2006, DOI: 10.1079/PNS2006489

Biofortification
Biofortification of essential nutritional compounds and trace elements in rice and cassava.
65, 153, 2006, DOI: 10.1079/PNS2006488

Blood pressure
Maternal nutrient restriction alters renal development and blood pressure regulation of the offspring.
65, 116, 2006, DOI: 10.1079/PNS2005484

Body dissatisfaction
Motivation for eating behaviour in adolescent girls: the body beautiful.
65, 376, 2006, DOI: 10.1079/PNS2006513

Body fatness
The effect of physical activity on body fatness in children and adolescents.
65, 393, 2006, DOI: 10.1079/PNS2006515

Bone growth and development
Nutrition and bone growth and development.
65, 348, 2006, DOI: 10.1079/PNS2006519

Bone health
Critical review of health effects of soyabean phyto-oestrogens in post-menopausal women.
65, 76, 2006, DOI: 10.1079/PNS2005476
Moderate alcohol consumption and increased bone mineral density: potential ethanol and non-ethanol mechanisms.
65, 291, 2006, DOI: 10.1079/PNS2006508
Nutrition and bone growth and development.
65, 348, 2006, DOI: 10.1079/PNS2006519

Bone measurements in children
Nutrition and bone growth and development.
65, 348, 2006, DOI: 10.1079/PNS2006519

Broccoli
Cruciferous vegetables and colo-rectal cancer.
65, 135, 2006, DOI: 10.1079/PNS2005486

Cancer chemopreventive agent
Vegetable-derived isothiocyanates: anti-proliferative activity and mechanism of action.
65, 68, 2006, DOI: 10.1079/PNS2005475

Carbohydrate
Glycaemic index and metabolic disease risk.
65, 125, 2006, DOI: 10.1079/PNS2005485

Cardiovascular risk factors
Hunting for new pieces to the complex puzzle of obesity.
65, 329, 2006, DOI: 10.1079/PNS2006510

Cassava
Biofortification of essential nutritional compounds and trace elements in rice and cassava.
65, 153, 2006, DOI: 10.1079/PNS2006488

Caveolin
Hunting for new pieces to the complex puzzle of obesity.
65, 329, 2006, DOI: 10.1079/PNS2006510

CHD
Developmental programming of health and disease.
65, 97, 2006, DOI: 10.1079/PNS2005478

Childhood obesity
The effect of physical activity on body fatness in children and adolescents.
65, 393, 2006, DOI: 10.1079/PNS2006515

Children
Dietary influences on cognitive development and behaviour in children.
65, 361, 2006, DOI: 10.1079/PNS2006511
Body fat measurements in children as predictors for the metabolic syndrome: focus on waist circumference.
65, 385, 2006, DOI: 10.1079/PNS2006514

Children and adolescents
Managing children and adolescents on parenteral nutrition: challenges for the nutritional support team.
65, 217, 2006, DOI: 10.1079/PNS2006502

Children's nutrition
Dietary management of food allergy in children.
65, 412, 2006, DOI: 10.1079/PNS2006516

Colon cancer
Is there a role for dietary salicylates in health?
65, 93, 2006, DOI: 10.1079/PNS2005477

Colo-rectal cancer
Cruciferous vegetables and colo-rectal cancer.
65, 135, 2006, DOI: 10.1079/PNS2005486
The fibre–folate debate in colo-rectal cancer.
65, 19, 2006, DOI: 10.1079/PNS2005472

Community development
Sustainability in local public health nutrition programmes: beyond nutrition education, towards community collaboration.
65, 418, 2006, DOI: 10.1079/PNS2006517

Comorbidities
Hunting for new pieces to the complex puzzle of obesity.
65, 329, 2006, DOI: 10.1079/PNS2006510

Complementary medicine
Herbal medicine: the science of the art.
65, 145, 2006, DOI: 10.1079/PNS2006487

Critical illness
Glutamine in critical care: current evidence from systematic reviews.
65, 236, 2006, DOI: 10.1079/PNS2006498
REducing Deaths due to OXidative Stress (The REDOXS© Study): rationale and study design for a randomized trial of glutamine and antioxidant supplementation in critically-ill patients.
65, 250, 2006, DOI: 10.1079/PNS2006505
The biochemical basis of antioxidant therapy in critical illness.
65, 242, 2006, DOI: 10.1079/PNS2006501

Cruciferous vegetables
Cruciferous vegetables and colo-rectal cancer.
65, 135, 2006, DOI: 10.1079/PNS2005486

CVD
Critical review of health effects of soyabean phyto-oestrogens in post-menopausal women.
65, 76, 2006, DOI: 10.1079/PNS2005476
Does genotype and equol-production status affect response to isoflavones? Data from a pan-European study on the effects of isoflavones on cardiovascular risk markers in post-menopausal women.
65, 106, 2006, DOI: 10.1079/PNS2005483
Long-chain *n*-3 PUFA: plant *v.* marine sources.
65, 42, 2006, DOI: 10.1079/PNS2005473
Whole grains and CVD risk.
65, 24, 2006, DOI: 10.1079/PNS2005482

Daidzein
Critical review of health effects of soyabean phyto-oestrogens in post-menopausal women.
65, 76, 2006, DOI: 10.1079/PNS2005476

Deficiency
Zinc: the missing link in combating micronutrient malnutrition in developing countries.
65, 51, 2006, DOI: 10.1079/PNS2005474

Developing countries
Zinc: the missing link in combating micronutrient malnutrition in developing countries.
65, 51, 2006, DOI: 10.1079/PNS2005474

Developmental status
Dietary quality and adequacy of micronutrient intakes in children.
65, 366, 2006, DOI: 10.1079/PNS2006512

Diet
Biofortification of UK food crops with selenium.
65, 169, 2006, DOI: 10.1079/PNS2006490
The fibre–folate debate in colo-rectal cancer.
65, 19, 2006, DOI: 10.1079/PNS2005472
Dietary influences on cognitive development and behaviour in children.
65, 361, 2006, DOI: 10.1079/PNS2006511

Dietary and lifestyle recommendations:
Nutrition and bone growth and development.
65, 348, 2006, DOI: 10.1079/PNS2006519

Dietary diversity
Linking biodiversity, diet and health in policy and practice.
65, 182, 2006, DOI: 10.1079/PNS2006494

Dietary management
Dietary management of food allergy in children.
65, 412, 2006, DOI: 10.1079/PNS2006516

Dietary recommendations
The ancestral human diet: what was it and should it be a paradigm for contemporary nutrition?
65, 1, 2006, DOI: 10.1079/PNS2005471

Dieting
Motivation for eating behaviour in adolescent girls: the body beautiful.
65, 376, 2006, DOI: 10.1079/PNS2006513

Diet quality
Dietary quality and adequacy of micronutrient intakes in children.
65, 366, 2006, DOI: 10.1079/PNS2006512

Disease risk
Whole grains and CVD risk.
65, 24, 2006, DOI: 10.1079/PNS2005482

Early childhood
Dietary quality and adequacy of micronutrient intakes in children.
65, 366, 2006, DOI: 10.1079/PNS2006512

Eating disorders
Motivation for eating behaviour in adolescent girls: the body beautiful.
65, 376, 2006, DOI: 10.1079/PNS2006513

Elimination diets
Dietary management of food allergy in children.
65, 412, 2006, DOI: 10.1079/PNS2006516

Energy expenditure
The effect of physical activity on body fatness in children and adolescents.
65, 393, 2006, DOI: 10.1079/PNS2006515

Enteral nutrition
REducing Deaths due to OXidative Stress (The REDOXS© Study): rationale and study design for a randomized trial of glutamine and antioxidant supplementation in critically-ill patients.
65, 250, 2006, DOI: 10.1079/PNS2006505

Ethanol
Alcohol, oxidative stress and free radical damage.
65, 278, 2006, DOI: 10.1079/PNS2006496

Ethnicity
Body fat measurements in children as predictors for the metabolic syndrome: focus on waist circumference.
65, 385, 2006, DOI: 10.1079/PNS2006514

Feminist methodology and methods
Getting quality in qualitative research: A short introduction to feminist methodology and methods.
65, 429, 2006, DOI: 10.1079/PNS2006518

Fertilisers
Biofortification of UK food crops with selenium.
65, 169, 2006, DOI: 10.1079/PNS2006490

Fetal programming
Developmental programming of health and disease.
65, 97, 2006, DOI: 10.1079/PNS2005478

Fibre
The fibre–folate debate in colo-rectal cancer.
65, 19, 2006, DOI: 10.1079/PNS2005472

Fish oil
Use of fish oil in parenteral nutrition: rationale and reality.
65, 264, 2006, DOI: 10.1079/PNS2006500

Folate
Genetic variation in genes of folate metabolism and neural-tube defect risk.
65, 204, 2006, DOI: 10.1079/PNS2006495
The fibre–folate debate in colo-rectal cancer.
65, 19, 2006, DOI: 10.1079/PNS2005472

Food additives
Dietary influences on cognitive development and behaviour in children.
65, 361, 2006, DOI: 10.1079/PNS2006511

Food allergy
Dietary management of food allergy in children.
65, 412, 2006, DOI: 10.1079/PNS2006516

Food-based approaches
Linking biodiversity, diet and health in policy and practice.
65, 182, 2006, DOI: 10.1079/PNS2006494

Food security
Achieving the goal of halving global hunger by 2015.
65, 7, 2006, DOI: 10.1079/PNS2005479

Free radical production
The biochemical basis of antioxidant therapy in critical illness.
65, 242, 2006, DOI: 10.1079/PNS2006501

Free radicals
Alcohol, oxidative stress and free radical damage.
65, 278, 2006, DOI: 10.1079/PNS2006496

Fruit and vegetables
Biological effects of fruit and vegetables.
65, 61, 2006, DOI: 10.1079/PNS2005480
Is there a role for dietary salicylates in health?
65, 93, 2006, DOI: 10.1079/PNS2005477

Gambia
Early immunological development and mortality from infectious disease in later life.
65, 311, 2006, DOI: 10.1079/PNS2006503

Genetic engineering
Plant foods for human health: research challenges.
65, 198, 2006, DOI: 10.1079/PNS2006492

Genetic variation
Genetic variation in genes of folate metabolism and neural-tube defect risk.
65, 204, 2006, DOI: 10.1079/PNS2006495

Genetics
Biofortification of UK food crops with selenium.
65, 169, 2006, DOI: 10.1079/PNS2006490

Genistein
Critical review of health effects of soyabean phyto-oestrogens in post-menopausal women.
65, 76, 2006, DOI: 10.1079/PNS2005476

Global hunger
Achieving the goal of halving global hunger by 2015.
65, 7, 2006, DOI: 10.1079/PNS2005479

Glutamine
Glutamine in critical care: current evidence from systematic reviews.
65, 236, 2006, DOI: 10.1079/PNS2006498
REducing Deaths due to OXidative Stress (The REDOXS© Study): rationale and study design for a randomized trial of glutamine and antioxidant supplementation in critically-ill patients.
65, 250, 2006, DOI: 10.1079/PNS2006505

Glutathione peroxidase
Biological effects of fruit and vegetables.
65, 61, 2006, DOI: 10.1079/PNS2005480

Glycaemic index
Glycaemic index and metabolic disease risk.
65, 125, 2006, DOI: 10.1079/PNS2005485

Growth hormone–insulin-like growth factor axis
Maternal nutrient restriction alters renal development and blood pressure regulation of the offspring.
65, 116, 2006, DOI: 10.1079/PNS2005484

Health
Health effects of vegetarian and vegan diets.
65, 35, 2006, DOI: 10.1079/PNS2005481
Wild-gathered fungi for health and rural livelihoods.
65, 190, 2006, DOI: 10.1079/PNS2006491

Health promotion
The ancestral human diet: what was it and should it be a paradigm for contemporary nutrition?
65, 1, 2006, DOI: 10.1079/PNS2005471

Herbal medicine
Herbal medicine: the science of the art.
65, 145, 2006, DOI: 10.1079/PNS2006487

Home parenteral nutrition
Home parenteral nutrition and the psyche: psychological challenges for patient and family.
65, 222, 2006, DOI: 10.1079/PNS2006497

Household
Improving the bioavailability of nutrients in plant foods at the household level.
65, 160, 2006, DOI: 10.1079/PNS2006489

Human evolution
The ancestral human diet: what was it and should it be a paradigm for contemporary nutrition?
65, 1, 2006, DOI: 10.1079/PNS2005471

Hyperactivity
Dietary influences on cognitive development and behaviour in children.
65, 361, 2006, DOI: 10.1079/PNS2006511

Hyperglycaemia
Hyperglycaemia and pulmonary infection.
65, 227, 2006, DOI: 10.1079/PNS2006499

Hypertension
Developmental programming of health and disease.
65, 97, 2006, DOI: 10.1079/PNS2005478

Immune ageing
Nutritional factors and immunological ageing.
65, 319, 2006, DOI: 10.1079/PNS2006507

Immune function
Early immunological development and mortality from infectious disease in later life.
65, 311, 2006, DOI: 10.1079/PNS2006503
Use of fish oil in parenteral nutrition: rationale and reality.
65, 264, 2006, DOI: 10.1079/PNS2006500

Immune response
Alcohol, oxidative stress and free radical damage.
65, 278, 2006, DOI: 10.1079/PNS2006496

Infection
Hyperglycaemia and pulmonary infection.
65, 227, 2006, DOI: 10.1079/PNS2006499

Inflammation
Use of fish oil in parenteral nutrition: rationale and reality.
65, 264, 2006, DOI: 10.1079/PNS2006500

Insulin
Hyperglycaemia and pulmonary infection.
65, 227, 2006, DOI: 10.1079/PNS2006499

Integrated medicine
Herbal medicine: the science of the art.
65, 145, 2006, DOI: 10.1079/PNS2006487

Intestinal failure
Managing children and adolescents on parenteral nutrition: challenges for the nutritional support team.
65, 217, 2006, DOI: 10.1079/PNS2006502

Iron status
Dietary quality and adequacy of micronutrient intakes in children.
65, 366, 2006, DOI: 10.1079/PNS2006512

Isoflavones
Does genotype and equol-production status affect response to isoflavones? Data from a pan-European study on the effects of isoflavones on cardiovascular risk markers in post-menopausal women.
65, 106, 2006, DOI: 10.1079/PNS2005483

Isothiocyanate
Vegetable-derived isothiocyanates: anti-proliferative activity and mechanism of action.
65, 68, 2006, DOI: 10.1079/PNS2005475

Kidney development
Maternal nutrient restriction alters renal development and blood pressure regulation of the offspring.
65, 116, 2006, DOI: 10.1079/PNS2005484

LDL-cholesterol
Biological effects of fruit and vegetables.
65, 61, 2006, DOI: 10.1079/PNS2005480

Lipid peroxidation
Alcohol, oxidative stress and free radical damage.
65, 278, 2006, DOI: 10.1079/PNS2006496

Lipoprotein oxidation
Biological effects of fruit and vegetables.
65, 61, 2006, DOI: 10.1079/PNS2005480

Lived experience
Getting quality in qualitative research: A short introduction to feminist methodology and methods.
65, 429, 2006, DOI: 10.1079/PNS2006518

Lung diseases
Hyperglycaemia and pulmonary infection.
65, 227, 2006, DOI: 10.1079/PNS2006499

Malnutrition
Achieving the goal of halving global hunger by 2015.
65, 7, 2006, DOI: 10.1079/PNS2005479
Zinc: the missing link in combating micronutrient malnutrition in developing countries.
65, 51, 2006, DOI: 10.1079/PNS2005474

Marine *n*-3 PUFA
Long-chain *n*-3 PUFA: plant *v.* marine sources.
65, 42, 2006, DOI: 10.1079/PNS2005473

Maternal nutrient restriction
Maternal nutrient restriction alters renal development and blood pressure regulation of the offspring.
65, 116, 2006, DOI: 10.1079/PNS2005484

Mechanisms
Moderate alcohol consumption and increased bone mineral density: potential ethanol and non-ethanol mechanisms.
65, 291, 2006, DOI: 10.1079/PNS2006508

Medicinal fungi
Wild-gathered fungi for health and rural livelihoods.
65, 190, 2006, DOI: 10.1079/PNS2006491

Meta-analyses
Glutamine in critical care: current evidence from systematic reviews.
65, 236, 2006, DOI: 10.1079/PNS2006498

Metabolic disease
Glycaemic index and metabolic disease risk.
65, 125, 2006, DOI: 10.1079/PNS2005485

Metabolic Syndrome
Body fat measurements in children as predictors for the metabolic syndrome: focus on waist circumference.
65, 385, 2006, DOI: 10.1079/PNS2006514

Metabolomics
Plant foods for human health: research challenges.
65, 198, 2006, DOI: 10.1079/PNS2006492

Micronutrient
Zinc: the missing link in combating micronutrient malnutrition in developing countries.
65, 51, 2006, DOI: 10.1079/PNS2005474

Micronutrients
Improving the bioavailability of nutrients in plant foods at the household level.
65, 160, 2006, DOI: 10.1079/PNS2006489

Millennium Development Goals
Achieving the goal of halving global hunger by 2015.
65, 7, 2006, DOI: 10.1079/PNS2005479

Moderate alcohol intake
Moderate alcohol consumption and increased bone mineral density: potential ethanol and non-ethanol mechanisms.
65, 291, 2006, DOI: 10.1079/PNS2006508

Mortality
Health effects of vegetarian and vegan diets.
65, 35, 2006, DOI: 10.1079/PNS2005481

Multidisciplinary approach
Home parenteral nutrition and the psyche: psychological challenges for patient and family.
65, 222, 2006, DOI: 10.1079/PNS2006497

***n*-3 PUFA in pregnancy**
Long-chain *n*-3 PUFA: plant *v.* marine sources.
65, 42, 2006, DOI: 10.1079/PNS2005473

Neural-tube defects
Genetic variation in genes of folate metabolism and neural-tube defect risk.
65, 204, 2006, DOI: 10.1079/PNS2006495

Nutrient–gene interaction
Does genotype and equol-production status affect response to isoflavones? Data from a pan-European study on the effects of isoflavones on cardiovascular risk markers in post-menopausal women.
65, 106, 2006, DOI: 10.1079/PNS2005483

Nutrition
Wild-gathered fungi for health and rural livelihoods.
65, 190, 2006, DOI: 10.1079/PNS2006491

Nutritional ageing
Nutritional factors and immunological ageing.
65, 319, 2006, DOI: 10.1079/PNS2006507

Nutritional factors
Nutrition and bone growth and development.
65, 348, 2006, DOI: 10.1079/PNS2006519

Nutrition health education
Sustainability in local public health nutrition programmes: beyond nutrition education, towards community collaboration.
65, 418, 2006, DOI: 10.1079/PNS2006517

Nutrition–immunity interactions
Nutritional factors and immunological ageing.
65, 319, 2006, DOI: 10.1079/PNS2006507

Obesity
Hunting for new pieces to the complex puzzle of obesity.
65, 329, 2006, DOI: 10.1079/PNS2006510

Oestrogen receptor β
Does genotype and equol-production status affect response to isoflavones? Data from a pan-European study on the effects of isoflavones on cardiovascular risk markers in post-menopausal women.
65, 106, 2006, DOI: 10.1079/PNS2005483

Parenteral nutrition
Managing children and adolescents on parenteral nutrition: challenges for the nutritional support team.
65, 217, 2006, DOI: 10.1079/PNS2006502
Use of fish oil in parenteral nutrition: rationale and reality.
65, 264, 2006, DOI: 10.1079/PNS2006500

Physical activity
The effect of physical activity on body fatness in children and adolescents.
65, 393, 2006, DOI: 10.1079/PNS2006515

Phytate
Improving the bioavailability of nutrients in plant foods at the household level.
65, 160, 2006, DOI: 10.1079/PNS2006489

Phytochemicals
Moderate alcohol consumption and increased bone mineral density: potential ethanol and non-ethanol mechanisms.
65, 291, 2006, DOI: 10.1079/PNS2006508

Phytotherapy
Herbal medicine: the science of the art.
65, 145, 2006, DOI: 10.1079/PNS2006487

Plant foods
Improving the bioavailability of nutrients in plant foods at the household level.
65, 160, 2006, DOI: 10.1079/PNS2006489
Plant foods for human health: research challenges.
65, 198, 2006, DOI: 10.1079/PNS2006492

Plant *n*-3 PUFA
Long-chain *n*-3 PUFA: plant *v.* marine sources.
65, 42, 2006, DOI: 10.1079/PNS2005473

Plants
Biofortification of UK food crops with selenium.
65, 169, 2006, DOI: 10.1079/PNS2006490

Post-menopausal women
Does genotype and equol-production status affect response to isoflavones? Data from a pan-European study on the effects of isoflavones on cardiovascular risk markers in post-menopausal women.
65, 106, 2006, DOI: 10.1079/PNS2005483

Pregnancy
Developmental programming of health and disease.
65, 97, 2006, DOI: 10.1079/PNS2005478

Programming
Early immunological development and mortality from infectious disease in later life.
65, 311, 2006, DOI: 10.1079/PNS2006503

Prostaglandin axis
Maternal nutrient restriction alters renal development and blood pressure regulation of the offspring.
65, 116, 2006, DOI: 10.1079/PNS2005484

Protective effect
Biological effects of fruit and vegetables.
65, 61, 2006, DOI: 10.1079/PNS2005480

Psychological challenges
Home parenteral nutrition and the psyche: psychological challenges for patient and family.
65, 222, 2006, DOI: 10.1079/PNS2006497

Public health nutrition
Sustainability in local public health nutrition programmes: beyond nutrition education, towards community collaboration.
65, 418, 2006, DOI: 10.1079/PNS2006517

Randomised controlled trials
Glutamine in critical care: current evidence from systematic reviews.
65, 236, 2006, DOI: 10.1079/PNS2006498

Rice
Biofortification of essential nutritional compounds and trace elements in rice and cassava.
65, 153, 2006, DOI: 10.1079/PNS2006488

Safety
Plant foods for human health: research challenges.
65, 198, 2006, DOI: 10.1079/PNS2006492
Wild-gathered fungi for health and rural livelihoods.
65, 190, 2006, DOI: 10.1079/PNS2006491

Salicylic acid
Is there a role for dietary salicylates in health?
65, 93, 2006, DOI: 10.1079/PNS2005477

Selenium
Biofortification of UK food crops with selenium.
65, 169, 2006, DOI: 10.1079/PNS2006490

Sepsis
The biochemical basis of antioxidant therapy in critical illness.
65, 242, 2006, DOI: 10.1079/PNS2006501
Use of fish oil in parenteral nutrition: rationale and reality.
65, 264, 2006, DOI: 10.1079/PNS2006500

Silicon
Moderate alcohol consumption and increased bone mineral density: potential ethanol and non-ethanol mechanisms.
65, 291, 2006, DOI: 10.1079/PNS2006508

Single nucleotide polymorphisms
Does genotype and equol-production status affect response to isoflavones? Data from a pan-European study on the effects of isoflavones on cardiovascular risk markers in post-menopausal women.
65, 106, 2006. DOI: 10.1079/PNS2005483

Social reality
Getting quality in qualitative research: A short introduction to feminist methodology and methods.
65, 429, 2006, DOI: 10.1079/PNS2006518

Socio-demographic factors
Dietary quality and adequacy of micronutrient intakes in children.
65, 366, 2006, DOI: 10.1079/PNS2006512

Stress
Hyperglycaemia and pulmonary infection.
65, 227, 2006, DOI: 10.1079/PNS2006499

Systematic reviews
Glutamine in critical care: current evidence from systematic reviews.
65, 236, 2006, DOI: 10.1079/PNS2006498

Thymus
Early immunological development and mortality from infectious disease in later life.
65, 311, 2006, DOI: 10.1079/PNS2006503

Vaccine response
Early immunological development and mortality from infectious disease in later life.
65, 311, 2006, DOI: 10.1079/PNS2006503

Vegan
Health effects of vegetarian and vegan diets.
65, 35, 2006, DOI: 10.1079/PNS2005481

Vegetarian
Health effects of vegetarian and vegan diets.
65, 35, 2006, DOI: 10.1079/PNS2005481

Waist circumference
Body fat measurements in children as predictors for the metabolic syndrome: focus on waist circumference.
65, 385, 2006, DOI: 10.1079/PNS2006514

Whole grain
Whole grains and CVD risk.
65, 24, 2006, DOI: 10.1079/PNS2005482

Wild edible fungi
Wild-gathered fungi for health and rural livelihoods.
65, 190, 2006, DOI: 10.1079/PNS2006491

World Food Summit
Achieving the goal of halving global hunger by 2015.
65, 7, 2006, DOI: 10.1079/PNS2005479

Zinc
Zinc: the missing link in combating micronutrient malnutrition in developing countries.
65, 51, 2006, DOI: 10.1079/PNS2005474
